Innovative Solutions

AUGUST INCORPORATED

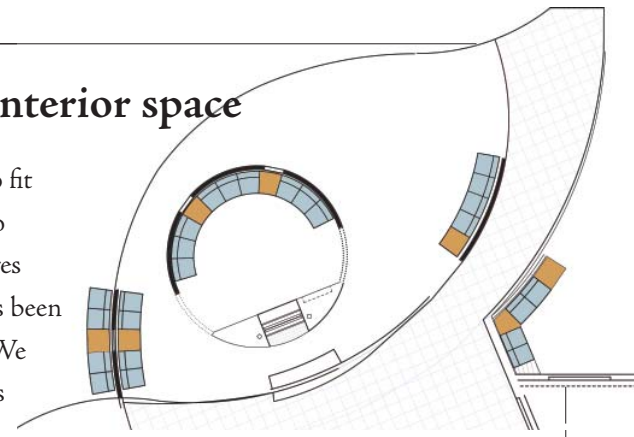

*August Incorporated  
—a seating company  
built around a single  
goal: to create seating  
exactly the way our  
customers want it.*

*Come along to  
see our solutions  
to three different  
customer needs.*

### Fitting a complex interior space

Working with customers to fit their architectural spaces, to achieve their design objectives successfully without risk has been a specialty of August Inc. We assist with AutoCAD plans to specify size and quantity of chairs, tables and benches for new spaces or for existing locations.

Site templates are supplied to guide the construction of new

walls, planters, flooring details, or to verify sizes of existing structures.

Special units have the same quality construction and features as standard models.

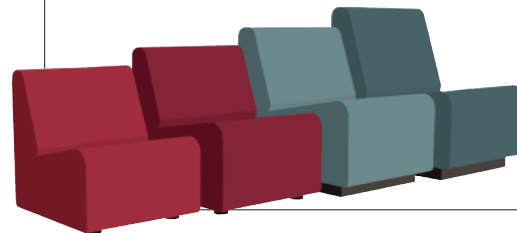

### Serving special needs

Safety was paramount for the students and faculty of Middlesex County College, which is why they required the seating to pass

California Flammability Bulletin 133.

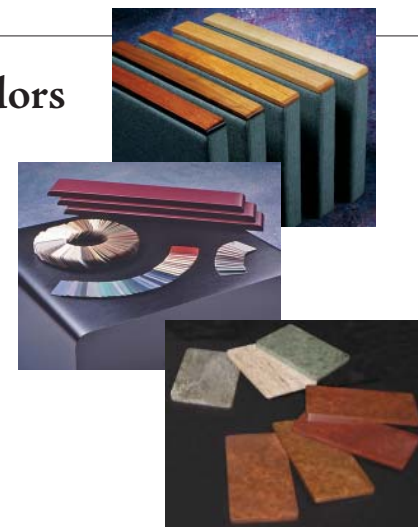

Special circular tables were required to fill the center of their circular seating islands, and non-skid glides for their terrazzo floors.

### Custom materials and colors

Down to the finishing touch—we help you to achieve your requirements for beautiful materials, colors and finishes.

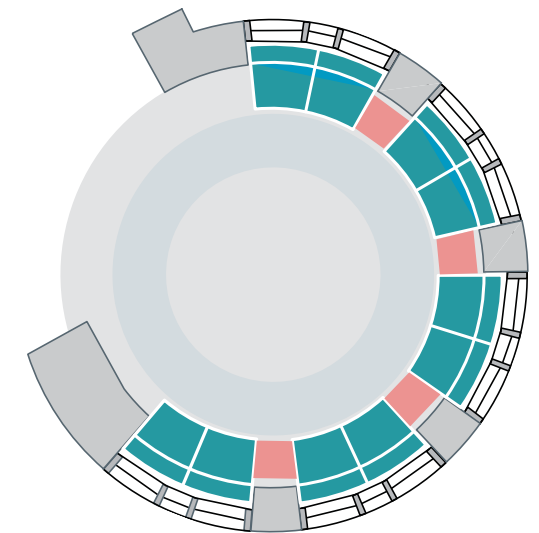

Texas A&M University's request for durable table tops to stand up to heavy usage in their airport led to new solid surface material options.

### FITTING YOUR SPACE

#### Patewood Memorial Hospital, Greenville Hospital System Greenville, South Carolina

Solariums in unique circular window walls on three floors create cheerful lounges for family waiting, patient visiting and patient rehabilitation. A custom installation with all of the features of the standard Laurel Series seating was achieved by using special size chair segments fit into each window niche, with tables sized to each divider column between the chair segments.

Full size templates for each Solarium were cut from the AutoCAD floor plans, assembled and checked at August Inc., shown at right. Templates were then sent to be checked on the building site.

Site check revealed variations in divider walls of the three solariums. New templates based upon site photos and measurements lead to the final fit.

**Special sizes made correctly, on time, without risk to designer or dealer!**

# SERVING YOUR SPECIAL NEEDS

## Middlesex County College

Edison, New Jersey

Founded in 1966, Middlesex County College offers a variety of degree programs and continuing education services to the community. Its 200 acre campus houses offices, classrooms, science and technology labs for faculty and commuting students in historic and contemporary buildings.

Laurel Series was chosen for new lounge area seating for its quality, design forms, durability and ability to meet California TB 133 flammability code.

As shown in the photo, the foam August uses for CA133 does not support combustion.

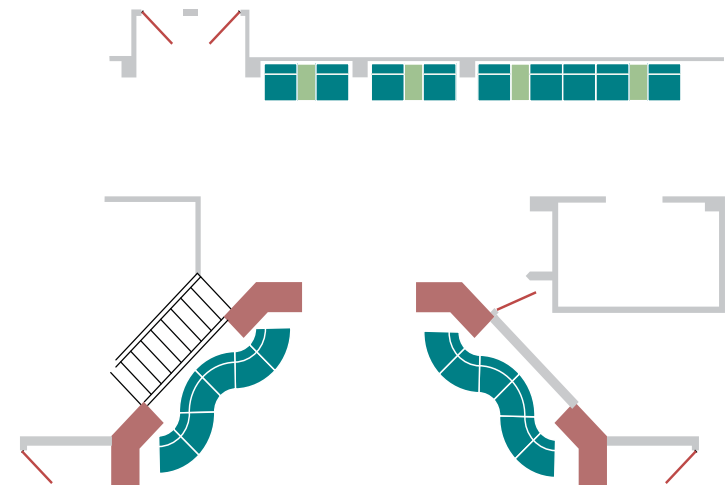

CA 133 requires that an upholstered seating unit pass a full scale burn test. Over 50 full scale burn tests of August seating have been completed by U.S. Testing. All passed CA133 by a high margin of safety. The table at right from U.S. Testing shows the actual test results of the upholstered seating used by Middlesex College.

Measurement Type A	Initial Value	Maximum Value	Time Occurred	Maximum Change	Maximum Allowable Change	Pass/Fail
1. Ceiling temperature, °F	77	147	0:01:19	70	200	PASS
2. 4-ft temperature, °F	77	114	0:01:32	37	50	PASS
3. Weight, lbf.	42	42	0:10:00	0	3	PASS
4. Carbon monoxide, ppm	0	239	0:00:50	00:00:00*	00:05:00*	PASS
5. Smoke opacity, %	100%	98%	0:01:55	2%	75%	PASS
6. Rate of Heat release, kW	0	25	0:01:31	25	80	PASS
7. Total heat release, MJ	0	3.2	0:10:00	3.2	25.0	PASS

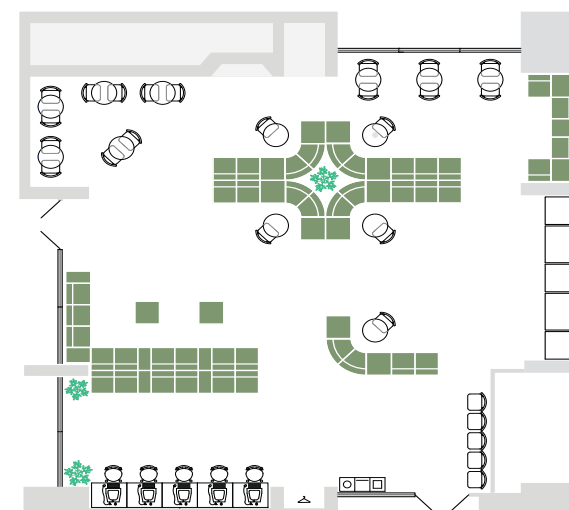

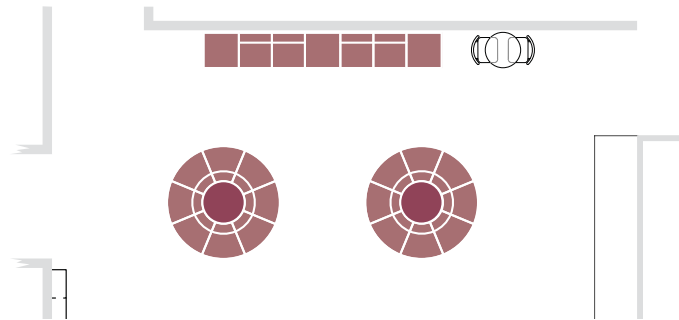

Total test time, (hr:min:sec): 0:10:00 \* refers to a value over 1000ppm for 5 minutes

Technical Services Center main entry and hallway lounges

Main Hall Lobby seating serves many functions—islands allow visitors to move easily through entries; the chairs and benches bring color and texture to the entry and provide places to meet. Custom tables fill the centers of each island of chair segments.

Bunker Lounge on the first floor of the College Center is a central location for students to spend time between classes. Laurel Series chairs, benches and tables create interior architectural groupings, dividing the room's large open space into smaller social areas. See floor plan at left. All units can be used individually or with each other, so that arrangements can be revised to new single or group seating. Non-skid glides have been used for the terrazzo floor; plinth base connectors hold groups in place.

## CUSTOM MATERIALS AND COLORS

### McKenzie Terminal Easterwood Airport, Texas A&M University College Station, Texas

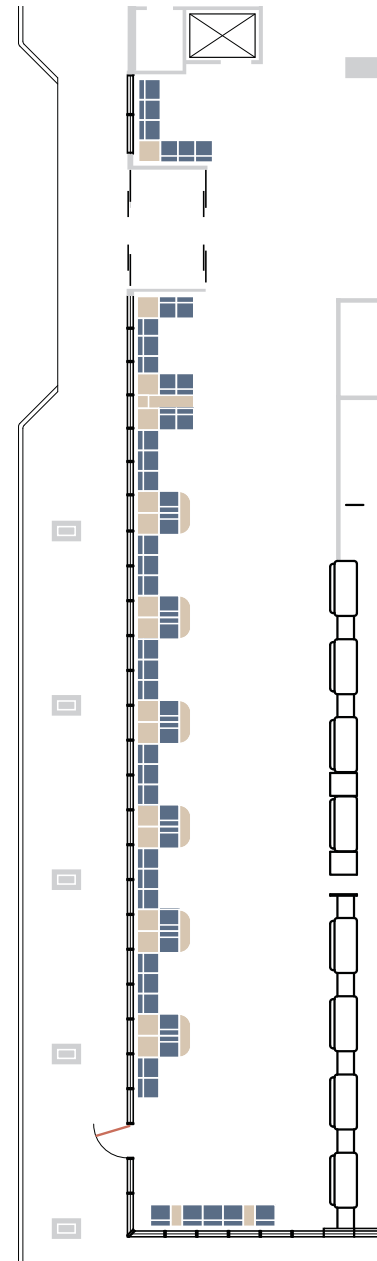

Easterwood provides a gateway to the world for the students, faculty and staff of Texas A&M University and the citizens of the Brazos River Valley. McKenzie Terminal furnishes full services to commercial airline passengers. On the other side of the airport, General Aviation facilities take care of private and charter aircraft and their passengers. Both locations use August seating.

**Mystera solid surface tops** are a new option added in response to our customer's request for very durable table tops. Mystera combines the look of natural stone with high performance and ease of maintenance of solid surface material.

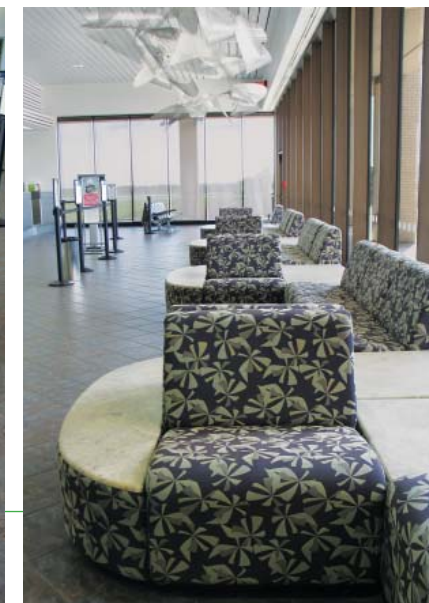

**Extra upholstery covers** purchased with their order will allow Maintenance to replace on site any chair covers that might experience damage, keeping all in use. Crypton finished fabric resists spills and dirt, making day to day cleaning quick and easy.

*Mystera is available in a wide variety of colors and patterns that echo the beauty of natural stone and wood. Colors go all the way through each piece. Non-porous, resistant to chemicals, stains, bacteria. Easy to clean and repair.*

Area seating groups along the window wall, opposite the check-in counters, offer 52 comfortable seating spaces for meeting passengers or waiting for flight departures. The fabric "Malibu" was chosen for its pattern which echoes the metal sculpture along the ceiling, created by a faculty member of Texas A&M.

*Serving you along the way Customer Service people with over 20 years of experience explain options and assist you in finalizing your floor plans. Helping you all of the way from general ideas to specific plans, samples, quotations, production and shipment means that you talk to real people, in real time, to get the complete information you want.*
