

Northside Branch Lexington Public Library Lexington, Kentucky

This isn't your grandmother's library...but she would be welcome and enjoy its many programs. From learning computer skills, to current topics, to entertainment - Northside Branch is a destination to please all ages from young children to seniors.

Teens have a special section too, their own room featuring books relating to teenage interests, computers, activity tables, and comfortable **Laurel Series** seating. Everything says "Welcome".

Bright colors and **Laurel Series** chair segments that form fun spaces set a relaxed, cheerful mood. It's a happening place where teens and friends can catch up on homework, collaborate on projects and learn how to access resources on the internet.

Reflecting their exposure to more electronic media, teens are more interactive, even reading differently. Computer chairs are double width benches, so that two people can work together on projects there.
