

Partnership II Building
 University of Central Florida Research Park
 Orlando, Florida

Partnership II Building is one of several UFC research park facilities for firms like Institute for simulation & Training, housing research and administrative staff.

Linn® Series chairs and chair segments provide lounge seating in a variety of spaces throughout the Partnership II Building. From a brief wait by the lobby reception desk to informal meetings by offices and presentation rooms, the chairs and segments make the most of each space.

Opposite facing curved groups fit seating for ten into a narrow junction of two halls. Rectangular chairs are used along other walls. since any of the rectangular or curved chairs fit together, they can be rearranged to new groups as desired, giving complete flexibility now and in the future.
