

Cornerstone Medical Center

Dayton, Ohio

Cornerstone Medical Center visitors are welcomed at the main reception area, then directed to the medical practices, lab or imaging services by the curving architectural walls.

Special diameter chair segments create comfortable lounge areas fitting the circular TV lounge and reception walls. Chair covers wipe clean or may be replaced as needed.

Customer Service assisted with AutoCad specifications to fit special chairs and tables to plans.

Full size templates for special inward and outward segment chairs and tables were supplied to check fit to actual walls on site, before special products' production.
