

### Children's Memorial Hospital, Chicago Child Life Center

The Child Life Center provides a respite for children and their families, including places to play and a place for quiet. The friendly atmosphere has an underwater theme, with spaces that swirl like the form of a Nautilus.

Linn® Jr. chairs in 30° segments have true radius curves which echo the floor design. Safe for playful children, the chairs' sturdy frames won't tip over. Foam cushioning on all surfaces and special bottom closures complete the structure. Upholstery covers are removable for cleaning or replacement.

Creative — Safe — Fun!
