

**Miss Porter's School
Farmington, Connecticut**

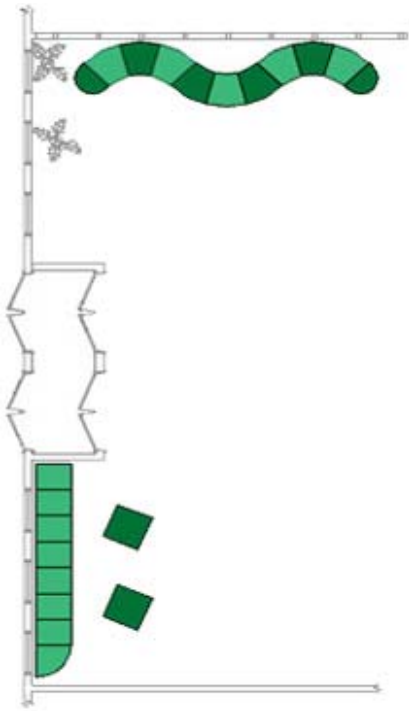

Swimming and diving facilities, squash courts and comfortable lounge areas, in a setting overlooking a river make this an outstanding new sports facility. The second floor lounge is a multi-purpose space for social events, and a gathering place for students and families during meets. Laurel Series sections maximize seating, adding color and texture along the walls, while bench segments add a central accent.

Laurel Series benches on each side of the first floor entry supply cost effective seating for many students between classes or meets.

Available in all segment sizes, the 30° bench segments shown echo swimming pool waves, their curved forms adding color and softness to the glass and tile hard surfaces.

Repeating green school colors, rectangular benches fill the front wall and form islands of flexible casual seating on the pool side.

Crypton finished fabric and faux leather covers wipe off now, are adjustable and replaceable on site for future new décor.

Renewable, flexible, comfortable – maximum benefits within the budget.
