

Miami, Florida
Courthouse Center

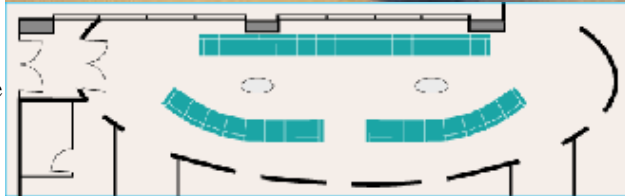

The Family Courthouse Center in Miami, Florida required maximum seating in many waiting areas, specially connected for high security, to serve their heavy caseload of court hearings.

Maximum use of space and a perfect fit to 40 ft diameter window walls was made by special Laurel segments. Matching standard chairs fit each room with individual and multiple places to meet every need.

Replaceable Covers

Maintenance of high use areas and replacement of damaged upholstery is easy with the Laurel Series, whose replaceable covers may be changed on site for all chairs and arms, including the special 40 ft. diameter circle chair segments.

Security

To keep individual chairs secure, 2 to 3 chairs, segments and arms were attached to a common plinth base, creating a single section. Then multiple unit sections were connected according room plans.
