

Football Players Lounge Purdue University

The football players lounge is a state of the art space beside their training and locker rooms. Renovated from a casual room, it now features a theater with large screen TV. Video games, computers, telephones and tables support a variety of activities in the entry area. In the screening room LS Series chairs and segments give full size comfort, using standard 28" width and 20 ft. diameter circle segments to fit a custom designed space.

Black Tuffalo nylon matrix provides strong, easy care upholstery. Site replaceable covers give options for future maintenance or décor changes. End arms with solid oak caps match millwork while giving solid support for big customers.

LS chair segments create comfortable sight lines from all angles. The back row is raised on a platform, cut to fit the true radius outside backs of the front row segments.

Full size templates guided site construction of the platform and custom table following the curved chair backs. LS security base system locks the chairs together, keeping them safely in place with a smooth, continuous base line.
