

Baton Rouge Community College
 Baton Rouge, Louisiana

Non-skid glides for the terrazzo floor and plinth base connectors keep every unit in its place.

Elliptical islands composed of chairs, benches and tables add color and texture to the architectural beauty of the interior.

Baton Rouge Community College serves people working in the city and students commuting in from the surrounding area. Laurel Series seating provides comfortable places to read or to meet friends between classes in the entry lounge areas of the new academic Louisiana Building.

Chairs, benches and tables are arranged back to back, creating islands of seating in the open passage ways on three floors. Benches offer design options for casual seating at low cost.

They are available in all of the Laurel Series chair sizes: rectangular 24, 28, 30" widths and segments in circle diameters from 8 to 20 feet.

Tables are also available in all of these sizes, allowing you to fit almost any facility or budget.
