

## University of Cincinnati Clermont Batavia Ohio

Expansion of the Clermont satellite campus of the University of Cincinnati created the opportunity for new student lounge spaces in the original main hall.

Renovation of the ground floor lounge area includes a small stage, tables and chairs, and seating groups forming study / social areas in the main room and secondary spaces.

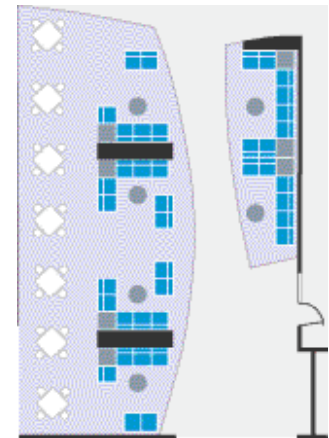

Laurel Series chairs carry a palette of colors, creating a seating design in jewel tones of blue, violet, and teal against the brick walls. Coordinating laminate tables finish the groups, echoing a combination of the colors.

The same principle of chair and color groupings was applied to another area, renovated from classrooms to a refreshment area and TV lounge.

Extra upholstery covers in each of the fabric colors were purchased to keep the installation looking fresh.
